

# SPECIAL FORCES SRC

## Suppressor Ready Perfection

The new Special Forces SRC pistol is based on our popular Special Forces SR model. Starting with our lightweight aluminum frame, we use a Chen Gen2 one-piece magwell, which provides a full 360 degree magwell funnel, without increasing the length of the frame. Ready for use with a suppressor, our threaded barrel is standard on this model. The slide features front and rear cocking serrations and is complete with a Trijicon RMR (Ruggedized Miniature Reflex) sight, which is the most rugged miniature red dot sight available, and has the versatility to be used in any lighting condition. Trijicon tall iron night sights complete the sight set up, providing the perfect backup sight system. A unique and highly durable Chainlink III pattern provides a secure grip for severe applications. Like all Ed Browns, the Special Forces SRC is built with 100% **Hardcore®** parts, and is backed by a LIFETIME warranty with the best customer service in the industry. Whether you're shooting for pleasure or tactical use, the Special Forces SRC is the perfect choice for a suppressor ready 1911.
