

EVO-E9-LW

The E9-LW is the first model in the EVO series equipped with a red dot sight. The 6 MOA dot promotes rapid target acquisition, while providing a precise point of aim. Featuring 25 LPI checkering, and fitted with a Chen Gen2 magwell, it is the ideal choice to add a 360 degree funnel, without increasing the height of the frame. Finished out with the exclusive Labyrinth grips, seven top slide and special front and rear cocking serrations, the E9-LW continues the striking appeal of the EVO series. Optimized for 9mm, it retains 100% 1911 controls and handling characteristics, and features an external extractor, easy-to-change front sight, fluted bull barrel, and a flat wire recoil spring system. Hand-built completely from fully machined components, loaded with custom features, and backed by a written Lifetime Warranty.
