

# EVO-KC9-OPTIC

All of the features you love about the KC9, now equipped with an optic to promote rapid target acquisition, while providing a precise point of aim. Optimized for the 9mm caliber, the KC9 retains 100% 1911 controls and handling characteristics, but re-designed to take advantage of modern improvements such as the external extractor, easy-to-change front sight, bull barrel, and a flat wire recoil spring system. The re-engineered slide has been shortened to 4", thinned substantially for weight reduction, and includes a unique 7-top custom cut, with special front and rear serrations. A recessed slide stop completes the package. Hand-built completely from fully machined components, loaded with custom features, and backed by a written Lifetime Warranty.
