

# ZEV 1911

Ed Brown Products, Inc. is excited to collaborate with ZEV Technologies, Inc. in the design of a new, aggressively styled 1911. Based on ZEV's most popular design, the Dragonfly, the design shares the aggressive styling while maintaining the structural rigidity of the 1911 slide. Taking a cue from the ZEV look, the dimpled barrel makes for a striking effect, being visible through the side and top slide ports. The top of the slide showcases our new 7-top slide cuts, and is topped with a Trijicon RMR sight and tall night sights. The integral rail frame features edgy machining accents on the rail, while the frontstrap is adorned with the FX1 Snakeskin. A threaded suppressor ready barrel complete with a ZEV thread protector, recessed slide stop with serrated pin, and a blended one-piece magwell housing, finish out this show-stopping pistol. As with all Ed Brown 1911's, it is hand-fit with fully machined parts, and backed by our Lifetime Warranty.
